Befestigung / Mounting/Fixing

Die Schrauben und Dübel müssen 500N Ausreißkraft je Befestigungswinkel standhalten. Die Auswahl der Schrauben und Dübel muß entsprechend dem Untergrund (Mauerwerk, Beton, Holz, Metall) und den Ausreißkräften getroffen werden. Die Auswahl soll dem Anspruch entsprechen, bei der Montage sowohl an die Wand als auch an die Decke.

The screws and dowels (wall plugs) should resist the pull-out strength of 500 N for each angle bracket. The selection of the screws and dowels should therefore correspond to the material of the respective supporting elements (brickwork, concrete, wood, metal) in such a manner that they will meet the aforementioned requirement, when mounting at the wall or at the ceiling.
